THINKING ABOUT SELF EMPLOYMENT OR STARTING YOUR OWN BUSINESS.....?

NEED SOME HELP TO GET OFF THE GROUND?

Whatever the reason, taking the first step to starting your own business can be a very daunting task. It is a fact that half of new businesses are likely to cease trading within the first three years of starting-up, showing that an entrepreneurial spirit alone is not always enough to convert an idea into a successful business.

Statistics show that an average of only 50% of new businesses seek advice before starting up, but the survival rate is 80% as opposed to 47% of total start ups.

Services Provided

We offer an initial point of contact for people considering self-employment along with the following support services:
